

## Example Pool Layouts

### Pool and Changing Room Customer Journey Example:

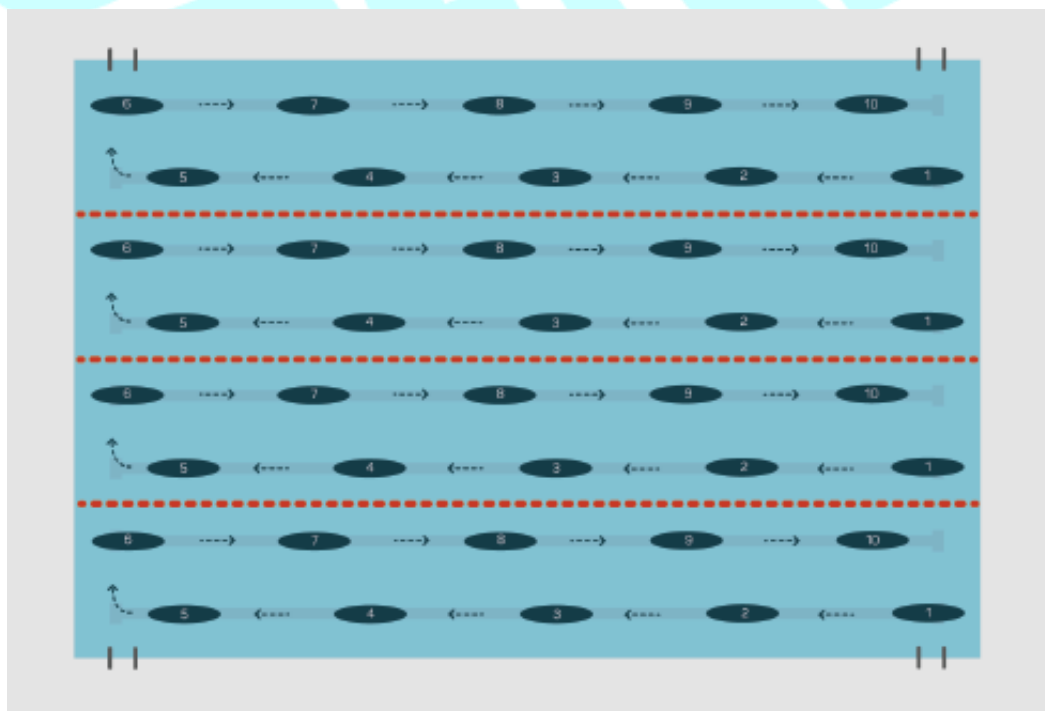

**Lane Swimming Example Layout – 6 Lane:**

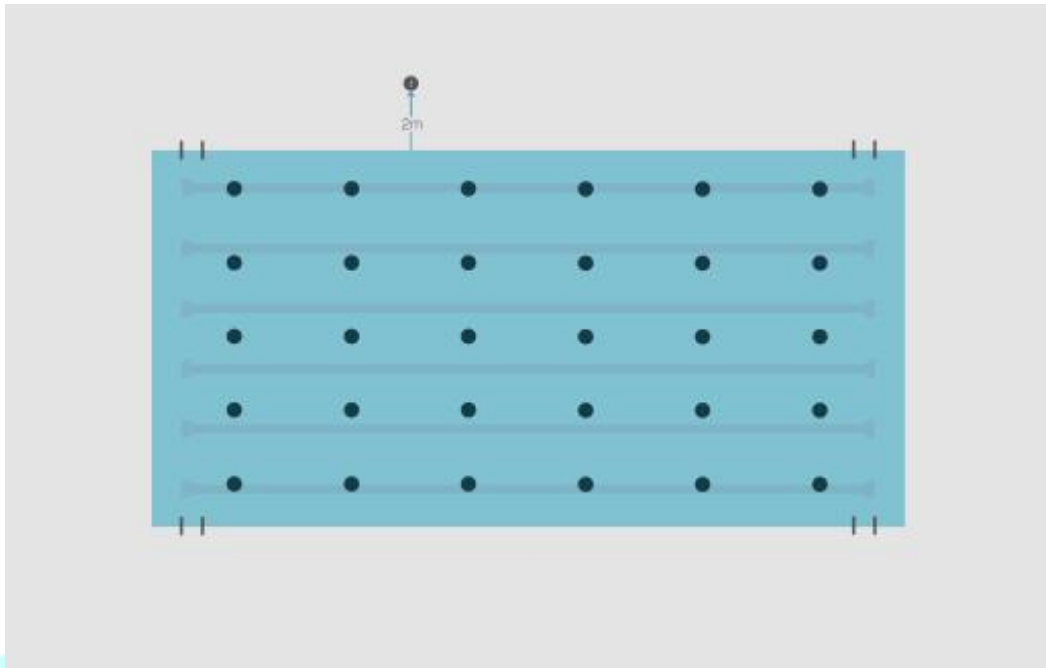

Double Lane format with all swimmers following a **clockwise** direction (based on 25m x 12.5m pool – 6 lanes – up to 10 per lane) Number of swimmers per lane must be risk assessment based on ability and speed etc. This should be adapted for pools of differing dimensions and lane numbers. For Example; a pool of 5 lanes could have two double lanes and one single lane, allowing for exit routes and rest stations in the single lane.

**Lane Swimming Example Layout – 8 Lanes (see notes above):**

**Aquatic Fitness Instructor-Led Example Layout:**
